Athletic Sports On Program For July 1st

Will Be Held Under Track and
Field Asso. Rules

As a result of a meeting held last Friday evening with Hester Lang, M. L. A. and A. W. W. representing the Track and Field Association of Medicine Hat, arrangements were made with the Stampede executive to put on a program of amateur athletic sports here on Dominion Day in connection with the annual Stampede.

Sanction has been given to have these events run under Track and Field rules and the necessary equipment will be provided for different events with an official representative of the Association here to assist with the carrying out of the program.

In the list of open events are 10 yard dash, half mile race, 100 yard race, broad jump, high jump, pole vault, and 100 yard dash open for ladies. For boys 14 years and under there will be a 100 yard dash and half mile race.

Officials of the Medicine Hat Track and Field Association with which Redcliff is affiliated have kindly offered to assist any prospective contestants from Redcliff in training and instructions for these events. Those wishing to take advantage of this offer should see Mr. Frank Baird who will make the necessary arrangements. This will be a start for Redcliff and district athletes to get into the provincial Track and Field events.

The Boy Scouts are trying to earn enough money to take them to Elkwater for an outing if you have any odd jobs, like washing cars or mowing lawns etc. just phone the Scout Master Leonard Hicks and a Scout will be at your service at short notice.

Another Busy Sunday On Soft-Ball Diamond

Redcliff Wins Two Games
From Hat Teams

Three softball games were played here last Sunday with Medicine Hat teams, Redcliff winning two while the third was called on account of the weather.

The first was between the Safeways girls and the local lassies, and resulted in a win for the Cliff Dwellers by a very narrow margin. Although the locals had a nice comfortable lead at the end of the sixth, the visitors made a nice rally in their half of the seventh. Busting the ball all over the diamond they piled up nine runs and tied the score before the Dwellers knew what was happening. In their half of the seventh, however, the locals first three up made safe hits and scored two runs clinching and finishing the game.

In the second game the Hat Independents and local Red Caps met but they had just finished the third frame when wind and rain ended the game with the visitors leading 4-0.

In the evening the two S. A. R. teams played which ended in a win for the local unit by 8 runs to 2.

The local lads had much the best of the game throughout although the visitors put up some snappy plays in spots.

Redcliff showed up to beat advantage both in the field and with the stick and the local pitchers had more strike outs to their credit.

It was one of the best games of the season from the fans standpoint and the local lads looked quite nifty in their new sweaters and caps.

Mr. and Mrs. I. Kitchen and family of Raymond spent the week-end here with Mr. Kitchen's parents Mr. and Mrs. J. Kitchen. George returned to Raymond with his brother where he will spend some time.

"Good-Bye Uncle Jock"

Said Vera Fick, (left) and Lyette Pepper, as they shook hands with Captain R. O. Latta, and left the Canadian Pacific liner Empress of Britain at Father Point, Quebec, to make an aeroplane dash to Montreal on their way to Chicago where they are contestants in the selection of a "Queen" of the Century Progress Exposition. No matter what the contest results Vera and Lyette will carry memories of a thrilling first voyage home with them. The Empress of Britain, one of the world's fastest liners, broke two records for them, and a combination of fast ship, fast plane and fast train gave the two pretty girls the distinction of making the fastest voyage from London and Paris to Chicago ever recorded.

They travelled so fast all the way that Mrs. Pepper, who landed at Father Point, Friday May 13, found breakfasting less than six hours later as Chicago, May 23. Mrs. Fick's record was from breakfast to breakfast. Canadian Pacific officials arranged every detail of their entire journey which, with the exception of two hours and fifty minutes in the air, was free of the facilities of that organization.

Redcliff Reminiscences

Taken From Our File of June
The 5th, 1914

The drilling machine for the Pioneer Oil Co. was shipped yesterday and will be in operation next week.

Practically no rain has fallen this spring. The crops are suffering.

Born—Friday, June 5th, 1914 to Mr. and Mrs. E. H. Sellhorn, a son.

The C. P. R. Steamship, Empress of Ireland was run into by a collier off Father Point Friday morning and sank in ten minutes. There were 1,250 passengers, 67 of whom are missing.

The following boys have passed the tenderfoot test for Scouts this week: Wm. Black, Fred Black, Wm. Henderson, Frank Kiddell, Jas. Dell, Gordon Lewis, Arthur Symon. The four patrols are called: Wolves, Congress Racoons, and Rattlesnakes.

Redcliff has been made a whistling station on the C. P. R. with a tri-weekly mail service. Redcliff business men are registering an emphatic protest against such a service.

Redcliff Juniors Win First Football Game

Defeated Hat Junior Calties by
1 Goal to 0

During the past week Redcliff had a winning streak on all lines of outdoor sport. Softball teams and the cricketers won all their games against the Hat and on Tuesday the junior football team added another win to the string by defeating the junior Calties of Medicine Hat on their own grounds by one goal to nil. The local juniors have a snappy line up and fans say their showing last Tuesday was a real treat. The teams were evenly matched for the first half in which there was no scoring, but in the last period the Cliffers had slightly the best of it and Ted Maskell located the net after some nice work by the forward line. The following were the Redcliff players: W. Paterson, A. Fairhurst, J. Loops, Jim Dutton, G. Garraoch, K. Henderson, T. Maskell, J. Dutton, B. Podesta, T. Lawson and E. Camp.

Local Rebekah Lodge Celebrates Anniversary

Hold Social in Their Lodge Hall
Last Evening

Vega Rebekah lodge celebrated its seventh anniversary on Wednesday last by holding a social evening after lodge.

Winners of bridge were—Lillian first, Mrs. G. Davis; golf's Mr. H. E. Leppard. Consultations went to Miss Hill and Mr. H. O. Anderson. After bridge all present sat down to supper.

The centre of the table was adorned with a huge birthday cake, lit up by seven candles, one for each year of the anniversary. The cake was again the gift of Mrs. Hill who has made this donation for the past seven years. The honor of cutting the cake fell to the No. 6 Grand of Vega Lodge, Mrs. C. Allenback, who gave everyone present a portion.

Mr. E. Johansson supplied the music for dancing.

Mrs. T. Jensen returned to town recently after an extended motor trip.

Mr. A. Stratton is at present in the Belcher hospital, Calgary, receiving treatment.

Mr. W. J. Fairbairn, who has been visiting in Calgary for the past week, returned home on Monday evening.

Miss Maud Wyatt has returned to her home here after completing her Normal course in Calgary.

The girl softballers will play Safeways girls here next Monday and the Woolworths on Wednesday. Both games will be played on the girl's diamond. Don't miss seeing them.

A splendid crowd attended the inspection of local cadets by Mr. Miller this afternoon. Owing to the high wind the school colours was abandoned for field in the leg of Mr. Hally and Mrs. Griev's house on Fourth St. The lateness of the hour prevents our giving a full report of the event in this week's paper, but we will do so in our next.

Redcliff Girls Beat Woolworths In League Game

Larup Them Thirteen to One
On Hat Diamond

Superior work in all corners of the diamond was responsible for the outstanding victory won by the Cliff Dwellers in their league game with Woolworths girls in Medicine Hat last Monday evening. Double plays, catching runners on long throws to second, third and at the plate were among the sensational plays by the Cliffers, which kept the 5 and 10 centers from scoring, turned the boys softballs green with envy, and gave them a win of 14 runs to 1.

The bargain girls scored their one and only run in the first inning. After that the Cliffers made them close shop like nine o'clock on a Saturday night.

The Cliffers battery performed the clock work. Fern Rinchall in the box made a wonderful full record. On several occasions it was just one two three and out, and little Miss Wyatt behind the bat was right there with her ten cents to snap up every bargain the Woolworth girls sent to the plate.

The Dwellers played their next game here with Safeways on Monday evening next on their own diamond. Opposing the town hall. Don't miss seeing it.

St. Barnabas Scouts Visit Redcliff Troop

Scout Rover Pleased With The
Local Lads

St. Barnabas Scouts from Medicine Hat paid Redcliff Scouts a visit last Friday evening to assist in organizing a Redcliff Troop and give a demonstration of Scout work on a Troop night. Rover L. Wade was also present and, accompanied by Mr. Hector, Lane M.L.A., inspected the troop. Mr. Wade expressed himself as greatly pleased with the progress the Redcliff Scouts are making and said they are one of the most active and alert of boys he has ever inspected.

Mr. Wade will be remembered as instrumental in organizing the first Scouts in Redcliff a number of years ago.

Redcliff was a busy place last Sunday. With three soft ball games and a cricket match, fans were kept busy taking them in.

Mrs. S. Harper left this week will visit with Mr. and Mrs. A. Lindsay for a time.

Miss Isabel Becker, of Calgary, arrived in Redcliff Tuesday evening on her way north in which they will appear at their next game. This will mean some expense it is hoped their attractive appearance at the games will increase the collections enough to meet the additional expense.

COMMUNITY WORK

Present indications are that house hudders in town are taving more than the usual interest in beautifying their homes and grounds this season.

This habit of beautifying homes is more or less contagious. It is something like keeping up with the Jones' only not so expensive, as only a little work is necessary to get into and keep in, the swim.

Since so much interest is shown in this direction this year it has been suggested to the Review that a competition be started and that a prize be given for the biggest improvement shown in the appearance of any residence and grounds in town during the summer. The prize need not be costly. Perhaps only a ribbon or a diploma suitably inscribed. Perhaps, again, the council might take the matter in hand and give a season's water for lawns and gardens free, to the winner. Anything that creates interest would be well worth trying out. Anything that creates interest and gets people pulling together in any community enterprise is good for that community.

POISONOUS WEEDS

Serious losses of live stock as a result of the eating of the poisonous weed known as water hemlock are occurring in the province, according to Dr. Percy Tabbot, Provincial Veterinarian who warns all live stock owners to be on the lookout for the weed which should be destroyed as quickly as possible by grubbing out the roots, drying and burning them. The water hemlock is a tall, erect, marsh plant growing from two to six feet high, with stems fast stout and streaked with purple, bearing a few pale green double compound leaves, and many quite flat clusters of very small greenish-white flowers. The root consists of a bunch of fleshy tapering projections attached to the root stocks. This poisonous plant is found in local patches throughout the province in the foothills and on the prairie, always in low, wet, marshy ground. It occurs along creeks, irrigation ditches, edges of sloughs, lakes and in low

meadow land. The most poisonous parts of the plant are the root-stock and root-but the stem also contains poison as well as the leaves of young plants. The poison acts quickly and is deadly.

JUST FOR FUN

There was a young fellow of Gloucester,
Whose wife ran away with a Coucuster,
He traced her to Leicester.
And tried to Arrceicester,
But in spite of his efforts he Loucester.

Where Dogs Are Important

Only Domestic Animal Of Unknown Race In Siberia

An unknown race of white people, four hundred strong and almost isolated from the rest of the world, live in the farthest north of the frozen land of Siberia, on the shore of the Arctic Ocean.

They are possibly descendants of unknown Arctic navigators of the sixteenth century, who were lost while questing for the northern route to India.

To the north they are hemmed in by the Polar Sea. Behind them on all sides is a barren, snow-bound, trackless domain, as vast as a continent.

The people can neither read nor write. They have no bread and no means of baking it. They have never seen milk, butter, or beef, for cows and cattle are unknown. They have never seen deer, horses, or fowl—not even a cat.

Potatoes and vegetables are utterly unknown, and only those who have travelled to barter their white furs have ever seen a living tree.

Their one domestic animal is the dog. Nowhere else on earth is the dog more important or held in higher respect. For without a dog the life of the people would be utterly impossible to these people.

In the white wilderness of the tundras, in the coast over a hundred miles from the sea, the dog can be seen on the fish caught in the Indigirka River, along the course of which the settlements extend.

Dogs and their masters live mainly on frozen fish. Even in summer it has but to be buried a foot deep in earth to freeze.

Every family has a team of three or four dogs, and in winter each team consists of from ten to eighteen. They draw the sleds which carry dressed furs and food and ice from the river and without them, hunting and trapping would be impossible.

A team usually consists of eight or ten dogs, in pairs, with a single leader, harnessed to a light sled pulled together with straps and without a collar and led from the river and without them, hunting and trapping would be impossible.

Should a white partridge or a white rabbit be seen, the dogs are sent to chase. The leader of the team must understand all orders, and know how to play the part of captain.

Should a white partridge or a white rabbit be seen, the dogs are sent to chase. The leader of the team must understand all orders, and know how to play the part of captain.

No whip is used in driving, but the dogs are kept in line by constant use of the voice. "Norkh-norkh" is the usual cry, "Norkh-norkh" is the usual cry, "Norkh-norkh" is the usual cry.

The dogs have greater endurance than the reindeer, and can draw a sled fifty miles in a day. Races are sometimes held and a team will give a short distance at twenty-five miles an hour.

Once the dogs have been over the ground, they will never lose their way.

Nothing In Old Stories

"Last Spile" Linking C.P.R. Was Probably Plain Iron

The "last spile" that was driven at Craigceligle to mark the linking of the east and west construction of the Canadian Pacific Railway was probably just plain iron—the same as 8 million other spiles used in the construction.

E. C. Boyes of Craigceligle heard stories about the "last spile" being gold and being removed after the ceremony. Boyes asked the C.P.R. about the spile and what happened to it.

As far as railway officials could learn, Boyes said, the spile was just an ordinary spile. It wasn't even removed immediately after the ceremony. Boyes said the spile was never found but probably disappeared as scrap iron years later when repairs were being made.

Most Everybody Plays

Husbands who have been deserted by wives for bridge parties all winter, remarker St. Thomas Times-Journal, will now get their own back by deserting their wives for golf all summer. It may be noted, says the Kingston Whig-Standard, that quite a few husbands play bridge and that some wives also play golf.

Reading isn't always believing; one sees little of people one can't believe.

London paid an average of \$1,600 to its policemen last year.

W. N. U. 1930

Sweeping Reforms To Be Made In London Police

According to a white paper on police reform published in the British capital, sweeping changes in administration and organization of the London Police Force are expected shortly. Publication of the paper followed sensational charges by Police Commissioner Lord Trenchard of widespread agitation and "insubordination" within the force. The proposals include drastic curtailment of time which police officers will be permitted to spend at meetings of the Police Federation, the Police Trades Union. This organization was severely criticized by Lord Trenchard. Our pictures show Lord Trenchard on the left, and a group of London "Bobbies" standing under the Marble Arch watching unemployed demonstrations.

Something To Remember

Letters Written On Lined Paper Weigh More In Bump Weather

A wet day is not as good a day to mail a letter as a dry day.

This was demonstrated when preliminaries to a dinner in honor of James Farley, United States postmaster-general, were over. The committee in charge of invitations for the dinner had elaborate invitations printed on choice linen. Enclosed in the envelope was a subscription card mentioning the \$6 for privilege of attending, and a return envelope.

Having some misgivings about the weight of the invitation, the committee took a sample to the post-office and had it weighed. It came within the three-cent stamp requirements. So the invitations were mailed.

The great scientific principle which the committee overlooked, however, was that the sample was weighed on a dry day, and the actual mailing done on a wet day.

It was found the linen paper, in accordance with well-known scientific principles concerning linen paper, began absorbing moisture, adding weight. It became overweight.

The post-office department put "Three cents due" stamps on them. The committee felt it had mailed a dry invitation and had a right to expect the post-office department to deliver a dry invitation.

The Ideal Parents

Standard Set Up By Children Not

Here are the ideal parents:

"The mother—she lets the children play the candy when company comes; she is a good cook and makes a fume over her children when they cook a meal; she reads to them, plays with them, lets them go see their friends and lets their friends come to their home; she allows her children to lick the frosting dough, has cookies and candy in the house and asks the youngsters what they like for supper."

"The father—he jokes and plays make-believe, he lets his sons use his tools; he is kind to animals; he plays baseball with the children and is a good father; he helps the children with their home work; he takes his sons hunting with him; and, he helps his wife."

These aren't the regulations drawn up by a child expert; they are the mandates of the children themselves as obtained from questionnaires from the students at Thurston Park School in Parma, a suburb of Cleveland.

Established Quarter Century Since the University of Alberta was founded at Edmonton 25 years ago, 2,166 students have graduated. Of those now living, 1,366 are residing in Alberta, 509 in the other provinces of Canada, 123 in the United States and 37 in other countries.

Helpfulness cannot be standardized. Giving until it hurts is not a true measure of charity. Some are easier than others.

Russian hunting expeditions expect to capture 150 white and 120,000 seals in Arctic waters this season.

Two Hundred Years Old

Harpisched in Spite Of Great Age Still Keeps Time

A music-maker of undoubted sweetness, in spite of great age, was recently taken to Montreal. Eighty-four years old, more than four feet high and nearly two feet deep, the monster weighs 67 pounds, but for all that finds no difficulty in moving around.

Normal heat is required for its well-being and there should be no extremes of temperature. When it is added it is 200 years old, but further information that it is a harpsichord will occasion no surprise. It is based on numbers, and is the property of the Society of Ancient Instruments, National Broadcasting Company. It is travelling with five Frenchmen with Albert Camus in charge. They play on the harpsichord, supported by original, psalteries, lutes and a number of other 17th century instruments.

Greater Than The King Abbott Of Westminster Once Took Advantage Of Superiority

Dr. Joseph Armstrong Robinson, who once dared to cross opinion with King Edward is dead.

As Dean of Westminster Dr. Robinson had been largely responsible for the arrangements of King Edward's coronation. King Edward is said to have had some differences with Robinson over the coronation and said, "Please remember I am King of England."

To this Dr. Robinson replied "Westminster, Sir, I am the Abbott of Westminster."

"This instance was a reminder that in earlier times the Abbott of Westminster was practically superior to the King."

A model of a honeycomb nearly six feet wide has been installed in the Institute of Bee Research in Berlin, Germany.

It has been decided in court that gold have a legal right to nest in this. This must be a great relief to the birds.

Buried With Military Rites

Galant Old War Horse Was Favorite Of U.S. Marines

The nod in green over a new grave at the navy yard in Portsmouth, New Hampshire. When the gallant warrior lying there was laid to rest, eight flags cracked a military salute and a bugle rent the morning air.

It is the grave of "Old Tom," gallant old war horse which died at the venerable age of 41.

Old Tom, favorite many years with the United States marine corps, was born in New York city in 1892, on New Year's day.

Two years later he "enlisted" with the leathernecks.

During the Spanish-American war, he learned the taste of war and heard the whistle of bullets, for "Old Tom" was wounded in a battle.

He recovered, and again ran active service, particularly at Guantanamo and San Juan Hill, where Theodore Roosevelt and his Rough Riders won undying fame.

At Old Tom's rough 30 marines rigidly stood at attention; it was these marines who since 1928 paid for his apples, sugar and fine hay that kept him contented and happy until his last days.

Gold Discovery At Coast

Rich Quarters Reported Found On West Coast Of Vancouver Island

Gold-bearing ore has been discovered on the west coast of Vancouver Island, according to word from the British Columbia Department of Mines. The discovery is reported to have been made by prospectors on Herbert Arm near Aboussit. Four hundred pounds of quartz from this vicinity were taken to Vancouver and examined and found to have a surprisingly high gold content.

It has been decided in court that gold have a legal right to nest in this. This must be a great relief to the birds.

Fragrant Herb Very Useful

Possession Of Mint Was Once Measure Of Wealth

Mint is not a humble plant, although it has come down in the world, for at one time this fragrant herb was the associate of kings and its possession a measure of wealth.

The mint grew wild all over Europe, and the herbal use of different species has been known for centuries. They wrote of it in A.D. 70, and in the days of ancient Rome mint was used as a bath-salt, as a verbena to cure headache, and as a herb to spread over the floors of temples and public buildings.

Mint is one of the plants of the Bible, and in the Book of Matthew you may read of the Pharisees paying tithes of mint, anise and cummin. Is it not a marvel that such a plant may now be purchased in bushes for a penny or two?

The spearmint (mentha viridis), now used in such large quantities for the production of chewing gum, is a native of many hedgerows. Possibly it was the same species which the Israelites employed for seasoning their food, a custom which has been passed on to the present day. As a seasoning mint is used in several methods of using mint.

In England we regard mint sauce as essential when lamb is served. In the States it is often boiled with vegetables, and perhaps it was from the Italians that we learned this method of using mint.

The peppermint of commerce is obtained from the leaves of mentha pipperita. It is used in sweets and in medicinal preparations for colds. Menthol also comes from the young leaves of a mint. In fact, there seems to be no end to the uses to which mint has been put.

Just Two Times Two

Farmer's Contract Looked Good But Was Impossible To Fulfill

Early in the eighth century a farmer made a contract which was a good one for him. He undertook to deliver for the sum of 10 tons of grain a year on the following Monday, four grains a week later, eight grains the week after that, and so on for the year. All went well for some weeks, but presently he found that his final delivery at the end of the year would require more grain than was sown in the whole of England.

He was worried by the thought that the law took place over the contract. What the farmer had not realized was that though twice two was four, two multiplied by itself fifty-two times comes to nearly ten thousand billion.

This number of grains of rye would represent about 1,000 million bushels. No man can work out just how many acres would have been required to grow the contract. Another farmer "two times two" case was that of the blacksmith who undertook to shoe a horse in a payment of one farthing for the first nail, a half-penny for the second, a penny for the third, and so on. At first sight this seems quite a reasonable charge—but try working it out!

Profitable Poultry Shipment

Good Prices Obtained In United Kingdom For Manitoba Birds

The 1,600,000 pounds of poultry shipped to the United Kingdom market early last winter with the assistance of the Canadian Co-operative Poultry Pool actually netted three to four cents a pound higher than the domestic price in Winnipeg or Montreal. This information was imparted to the House of Commons by Hon. Robert Wex, Minister of Agriculture during consideration of his estimates.

The first trial shipment—there were 33 carloads in all—came from Manitoba; and the reception accorded the Canadian poultry in the United Kingdom was exceedingly gratifying.

Demands for more Canadian poultry had resulted, added Mr. Wex. The should not be in doubt what good in relieving local market conditions. No person, he commented, could give a safe estimate as to the limit the United Kingdom market could absorb.

Only Three Methods

Only three different means have been found to propel ships of any size through the water, the paddle wheel, the screw, and the jet—that is, pumping the water in through the bow and out at the stern and "sucking" the ship along.

Keeps Money Circulating

Business, generally is better. Keep the dollars circulating. You have heard the story, haven't you, of the bogus five-dollar bill which went the rounds and was finally destroyed. It was a very effective work while it was circulating.

Gardening Notes

By Gordon Lindsay Smith

Before finally disposing of the new seedling and planting end of the flower garden, it is well to check over the varieties and types in order to make sure that all requirements have been complied with. One's garden should be balanced. That is, there must be variety of colors, shades of colors, as well as hot, dry ones, planted with something useful, plenty of tall ones, some double-flowered, and some single-flowered. The latter bloom from June until frost, fences and vegetable garden are covered with all bushy things and annual climbers and a fair showing of the new and vastly improved both single and double flowers.

An Intensive Vegetable Garden

It is really remarkable the amount of vegetables that can be produced in a plot twenty feet square. Sufficient tomatoes for a small family will be grown on six or eight plants. These, of course, should be staked and may be set in eighteen inches apart. The stakes are six feet long and are driven in close to the plant when the latter is set out. Planch all the side shoots, training the single main stem over the pole and tying it about every foot. Each week during the growing season the plants should be inspected and all side shoots nipped off. In between where the tomatoes are growing, narrow rows of lettuce, using an early and late type, and also the Cos variety which will supply the table during the late summer and early fall. One two rows of beans are advisable as these yield very heavily for the amount of space taken up. Make two plants about three or three weeks apart. Fifteen inches is sufficient space between rows. Carrots and beets will give very good returns and should be grown twelve to fifteen inches between rows. Spinach is also a heavy yielder and as it grows slowly, the plants should be spaced before the later vegetables require full room. On this account it, as well as lettuce and radish, can be planted in between the rows of beans, peas and cabbages. Swiss chard will supply a huge quantity of greens from as late as fifteen feet of row. The inner stalks are used like asparagus and the leaves like spinach. Onions can be included in the small garden and only need about eight inches between rows. Corn takes up quite a lot of room but it is never quite so good as when grown in a field. In the garden, it is well to include it. It yields an average of three cobs to every two stalks, and it may be planted in hills about a foot apart. Along the fences one can grow melons, cucumbers, pole beans, and so on.

These Require Warmth

There are certain flowers and vegetables which must not be set outside or the frost soon will be waiting to destroy them and there is no longer danger of frost. Of course, in some sections of the country, the weather is so warm that it is considered, but most of them are as the farther north one goes the longer are the summer days and the greater the risk of frost.

In the flower line these hot weather plants, in the order of planting run about as follows: Dahlias, double and single in bulbs or tubers and Asters, Petunias and many other bedding plants which cannot stand frost. The three first named should be planted about three times as deep as the diameter of the bulbs or tubers, and the Dahlias, especially should be staked. In the bedding plant group, it is advisable to secure or grow in the hot bed and cold frame stout branching plants, rather than too tall ones. In transplanting, expose to sun as little as possible, water well and add a pinch of commercial fertilizer dissolved in water to the nearby soil.

Inexpensive Sport

Wellesley College and other students going for the less expensive sports, riding and golfing, declining as tennis takes a spurt. Some pedestrians will contend that if tennis continues long enough a golden discovery must come—that trained walking is one of the most satisfying and rewarding sports of all.

Hotchpotch strawberries picked at Wareham, Hampshire, England, have been sold for \$6.00 a pound.

Hall's 1937 coffee crop is expected to total 79,888,000 pounds.
